

# Data Center Operation: VIZOR

High level data center key parameters on the go via your tablet or smart phone.

Key data center capacity parameters on power, cooling, space, and network as well as high level values on data center utilization straight to your smart phone or tablet.

*Data Center Operation: VIZOR can currently run on Apple iPhone, iPad, and Android-based devices.*

## Data Center Infrastructure Management Application for StruxureWare Data Center Operation

Data Center Operation: VIZOR delivers key data center capacity parameters straight to a wireless device such as Apple iPhone®, iPad®, BlackBerry®, or Android-based smart phone devices.

- > High level values of data center utilization at a glance.
- > Shows key performance indicators on power, cooling, space, and network within the data center.
- > Drill down view into any location or room and predict the remaining capacity based on current growth rate in your data center.
- > Access to complete asset inventory and details straight to your smart phone device or tablet. Graphical overview of power, cooling, space, and network.
- > Access to complete asset inventory and details straight to your smart phone device or tablet.

Providing key data center capacity parameters on power, cooling, space, and network as well as high level values on data center utilization on the go.

*Overview of network capacity displayed on Apple iPad.*

# Features & Benefits

Availability	Benefits
Capacity overview	Global management overview of available data center capacity for a high-level understanding of power, space, cooling and network utilization.
Business KPIs	Shows key performance indicators on power, cooling, space, and network within the data center, providing business-level decision support on future data center investments or consolidation projects.
Remaining capacity	Drill down view into any location or room and predict the remaining capacity based on the current growth rate in your data center.
Wireless overview of asset inventory	Access to complete asset inventory and details straight to your smart phone device or tablet.
Graphical overview	Graphical overview of power, cooling, space, and network usage defined on a weekly, monthly, or yearly basis.
Barcode scan functionality	Built-in barcode scanner for easy identification of assets

**Prerequisite:**

StruxureWare Data Center Operation

**Product Module Options:**

Data Center Operation: Capacity  
 Data Center Operation: Change  
 Data Center Operation: IT Optimize  
 Data Center Operation: Energy Efficiency  
 Data Center Operation: Energy Cost  
 Data Center Operation: Insight

**Enhancement Options:**

Data Center Operation: VIZOR  
 Data Center Operation: Mobile  
 Data Center Operation: Dashboard

**Data Center Monitoring Option:**

StruxureWare Data Center Expert
