

# Vision PowerPack for IBM i and IBM AIX Availability on the IBM PureFlex System

As IT moves to the strategic center of today's businesses, profound changes are taking place that demand new and innovative solutions. IBM is delivering this innovation with the introduction of their PureFlex Expert Integrated Systems. Just as critical to the needs of today's changing IT requirements is an availability imperative that demands a high level of system accessibility and uptime through protection against planned and unplanned downtime.

The Vision PowerPack™ for IBM i and IBM AIX Availability on the IBM PureFlex System is a customized offering that combines hardware, software and services to help companies fulfill their commitments to customers and maximize business performance by keeping systems protected, productive and available

## A New Breed of Systems

IBM's PureFlex System is a new class of servers that combine the flexibility of a general purpose system, the elasticity of cloud and the simplicity of an appliance to deliver a system with integrated expertise.

- **Built-in Expertise:** Capturing and automating what experts do—from the infrastructure to the application
- **Integration by Design:** Deeply integrating and tuning hardware and software—in a single, ready-to-go system
- **Simplified Experience:** Making every part of the IT lifecycle easier with integrated management of the entire system and a broad open ecosystem of optimized solutions

*The IBM PureFlex System and Vision's MIMIX Availability combine to meet the flexibility and availability needs of today's cutting edge IT environments*

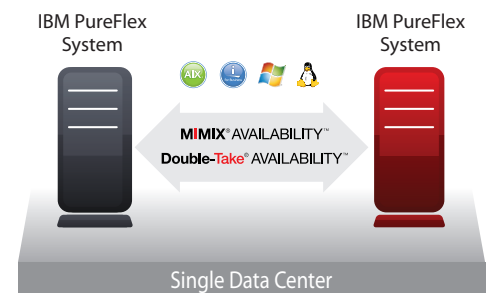

## Expert, Integrated System

The IBM PureFlex System can help organizations achieve greater agility, enabling them to adapt to workload spikes and deliver new business capabilities; increased efficiency by consolidating IT resources and raising productivity; improved simplicity for ease of management, deployment and integration; and enhanced control to help reduce risk and ensure reliability

- **Consolidate** – More efficiently consolidate systems and applications to reduce operating expenses
- **Optimize** – Better tune and automate systems and applications to improve application performance, scalability and reliability
- **Innovate** – More rapidly deliver new applications and services to meet new business needs
- **Accelerate Cloud** – More quickly enable secure, and integrated cloud environments

Downloadable Virtual Appliance for AIX combines the operating system image with Double-Take RecoverNow for AIX in a single package to speed and simplify deployment.

## Simplified Availability for a Complex World

MIMIX Availability for IBM i provides simplified availability in a complex world by efficiently replicating business transactions in real-time and maintaining local and/or remote switch-ready recovery system(s). In the event of a production system failure the business is able to continue business operation on the recovery system without data loss and with minimal downtime.

- Simplified management with the Vision Solutions® Portal
- Superior replication technology and performance
- Comprehensive auditing insures confidence in successful switching
- Automated optimization of IBM i environment

*Vision Solutions' availability offerings are the perfect complement to the IBM PureFlex System for unparalleled levels of system and application availability.*

### **MIMIX Availability**

- Powerful integration with IBM Systems Director provides critical system information and status related to system and application availability
- Automated optimization of IBM i environment improves system efficiency, performance and resilience
- Supports virtually any application environment and network topology, including virtual environments
- RTO and RPO that meets the most aggressive regulatory mandates and Service Level Agreements (SLAs)
- Supports heterogeneous storage environments; internal, external, SAN, NAS, iSCSI, even multi-vendor

### **Double-Take RecoverNow for AIX**

- Advanced Data Protection and Flexible Recovery including any-point in time recovery with CDP
- Downloadable Virtual Appliance combines the IBM AIX operating system image with Double-Take RecoverNow in a single package to speed and simplify deployment
- Supports virtually any application environment and network topology, including virtual environments
- Powerful integration with IBM Systems Director provides critical system information and status related to system and application availability
- RTO and RPO that meets the most aggressive regulatory mandates and Service Level Agreements (SLAs)
- Integration with IBM PowerHA for AIX to provide full-featured HA with offsite disaster recovery protection
- Supports heterogeneous storage environments; internal, external, SAN, NAS, iSCSI, even multi-vendor

### **Vision Solutions**

Vision Solutions is a leading provider of high availability, disaster recovery and migrations solutions for IBM PureFlex systems. Offering solutions for Windows, Linux, IBM i and IBM AIX computing environments. Vision can ensure business continuity, increase productivity, reduce operating costs and satisfy compliance requirements.

Vision Solutions oversees a global network of business partners and services and support professionals to help you achieve your business goals.

### **The Expertise to Bring it All Together**

Vision Consulting Services put our world-class high availability, disaster recovery and business continuity expertise to work for you to complete your availability solution. Structured around years of experience and industry best practices, Vision's Consulting services can save you real time and money while ensuring rock-solid results.
